Eastern Shore Lead Safe Homes Program Extended to October 30, 2009

The Eastern Shore Lead Safe Homes Program has been extended until September 30, 2009. The A-NPDC administers the Lead Safe Homes Program to reduce lead hazards in homes where lead paint and soil contamination is suspected. To apply for the program, families must own or rent a home built before 1978, have children under age 6 spending significant time there, and meet HUD income guidelines.

Lead hazard reduction house before rehab

Households with young children need to know that most children who have been lead poisoned show no symptoms initially, but can eventually suffer from abnormal brain development resulting in learning disabilities and behavioral disorders. According to the Eastern Shore District Health Dept. Nurse Supervisor, screening is per-

formed at WIC clinics for children ages 1 and 2, but all caregivers are urged to have children tested by their pediatricians. Lead dust is almost invisible, but can be cleaned effectively using methods recommended by the Health Department.

Services provided by the Program include lead risk hazard assessments, inspection of properties inside and outside, and when hazards are found, hiring contractors certified in lead abatement to reduce hazards. Methods include wet sanding and repainting, repair or replacement of windows, encapsulating components (i.e. using vinyl siding and window wrap), and demolition of deteriorated outbuildings and removal of contaminated soil.

Lead-certified contractor worker

For more information or to apply, call Program Administrator Patti Merritt at 757-787-2936, ext 119. For information on lead poisoning and testing, call the Health Department. at 787-5880 (Accomack County) or 442-6228 (Northampton County).
